

Insight® and Education: Collaboration and Discovery

Teaching with digital assets is now the norm, not the exception in higher education. The digitization of text, image, audio, and video is a major objective for institutions today but unless they can also succeed at delivering this content to targeted users, digital projects will fail.

Luna Imaging's Insight Software Suite will ensure success both in and out of the classroom. Insight's web-based browser and advanced viewing tools allow faculty and students alike to easily and creatively work with digital collections.

Key Insight Benefits for Faculty

- Spend more time creating a curriculum, not running after images.
- Create, share, and export media groups and export presentations to HTML, PowerPoint and KeyNote.
- Create and share Personal Collections.
- Create your own catalog templates and map them to standards.
- Export images and associated metadata.
- Easily embed links to images and presentations in outside courseware.
- Collaborate with other faculty to create inter-disciplinary collections.
- Control access to groups and presentations created for specific classes and students.
- Instantly access hundreds of thousands of images via free and subscription based content.
- Integrate your images with outside web resources.

Key Insight Benefits for Students

- Spend more time learning, not running after images.
- Discover new ideas with advanced viewing tools.
- Easily discover new content through faceted search results.
- Create your own account to manage viewing preferences, and control access to your groups and presentations.
- Easily embed links to images and groups to outside websites and collaborate with others.
- Perform advanced searches or use simple keyword searching.
- Create your own Personal Collections.

Insight for the Institution: one license, one price, one good decision

- Leverage your investment, share collections, and control distribution throughout an entire institution.
- Create an unlimited number of collections with an unlimited number of objects.
- Insight is platform-agnostic so it can be easily implemented and maintained in your environment.
- Insight's central index will make cross-collection searching fast and easy.

Don't let the DAMS (Digital Asset Management System) hold back your institution's creativity; let discovery and collaboration flow with the Insight Software Suite.

To learn more about creating an enhanced learning environment with Insight visit www.lunaimaging.com, email us at sales@luna-img.com or call us at 1-800-452-LUNA (5862). Hosting, data migration, and collection building services are also available.
